Miriam Sutton: *Teacher at Sea*

THURSDAY, AUGUST 14 AT 6:30 PM

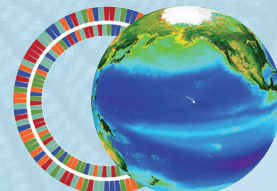

Hanauma Bay Nature Preserve Theater • Free and open to the public • Parking free after 5:30 pm

Miriam Sutton, a North Carolina middle school teacher, participated in the C-MORE/ OPEREX research cruise as a Teacher at Sea. During the cruise, she provided communication and developed educational activities that assisted teachers and scientists in bringing the research project into the classroom.

Her main objectives were to establish an online blog to communicate with teachers and students while at sea; to develop simplified experiments that link the cruise activities to the classroom; to interact and assist scientists with their research projects; and to generate photo/video documentation of the research cruise.

She will give a short 10 minute presentation on her adventure just before Grieg Steward's lecture "Marine Viruses—Are They Threats to You?" Her blog is archived at cmore.soest.hawaii.edu/cruises/operex/sutton_blog.htm and will remain available.
